SUMMARY

Passionate frontend web developer with A years of experience in designing and developing clean, responsive, and production-ready websites. Proficient in React, Redux, and Tailwind CSS. Demonstrated success in delivering high-quality projects within deadlines, both independently and as part of a collaborative team.

PROJECTS

YouTube Clone (01/2025)

Tech Stack:HTML, CSS, Tailwind, JavaScript, React, Redux, Framer motion

- Developed a fully re sponsive YouTube Clone with a modern UI, mimicking core features the original platform using React and Tailwind CSS
- Integrated YouTube Data API (or mock API) to enable real-time video browsing, search functionality, and detailed video playback pages with comments and suggestions.
- Utilized Redux for efficient state management of search queries, selected videos, and user interactions, while enhancing UI transitions with Framer Motion for a smooth user experience

Netflix Clone (08/2024)

Tech Stack:HTML, CSS, Tailwind, JavaScript, React, Redux, Framer motion

- Designed and developed a fully responsive Netflix Clone leveraging the TMDB API to stream real-time movie and TV show data with a visually engaging UI.
- Implemented key features such as dynamic search, genre-based browsing, video playback for trailers/clips, and personalized content recommendations.
- Improved UX with Framer Motion and Redux for filters, modals, and interactions.
